

Cúram Catalyst

A trusted foundation for an AI-driven future

Cúram expertise transformed into AI that helps health and human services agencies design, configure, modernize, and evolve Cúram solutions faster and with greater confidence.

Expertise amplified by Artificial Intelligence (AI)

Cúram Catalyst is an AI-powered service and skills layer that brings trusted Cúram expertise into every phase of the social program lifecycle. It helps agencies build, understand, operate, and evolve Cúram solutions faster and with less effort, while keeping experts in control every step of the way.

Designed for a changing environment

Health and human services agencies do important, complex work. Every day, they help families access benefits, connect people to services, and respond to changing policy, all while managing growing caseloads, tighter budgets, and increasing expectations from the people they serve. As policy changes accelerate and modernization timelines continue to shrink, agencies are under growing pressure to deliver new programs and services faster while managing cost, complexity, and resource constraints. At the same time, experienced implementation specialists are becoming harder to find, institutional knowledge is difficult to retain, and organizations are looking for practical, governed ways to apply AI that deliver measurable value. Cúram Catalyst was built for this environment, helping agencies move faster, preserve expertise, reduce effort, and continuously evolve their solutions with confidence.

For more than 25 years, Cúram has powered how government agencies deliver benefits and services to the people who depend on them most. Cúram Catalyst is the next chapter. It combines that deep health and human services expertise with the power of AI, making trusted Cúram expertise available whenever agencies need it.

Rather than relying solely on scarce specialists to understand requirements, configure solutions, document decisions, analyze impacts, create tests, or plan upgrades, agencies can leverage proven implementation knowledge, product expertise, and best practices throughout the entire lifecycle.

Cúram Catalyst helps agencies move from policy to delivery with greater speed, confidence, and insight. It transforms legislation, policy, and business requirements into implementation-ready Cúram artifacts, including configured rules, program logic, case types, workflows, and other solution assets that accelerate delivery and reduce manual effort.

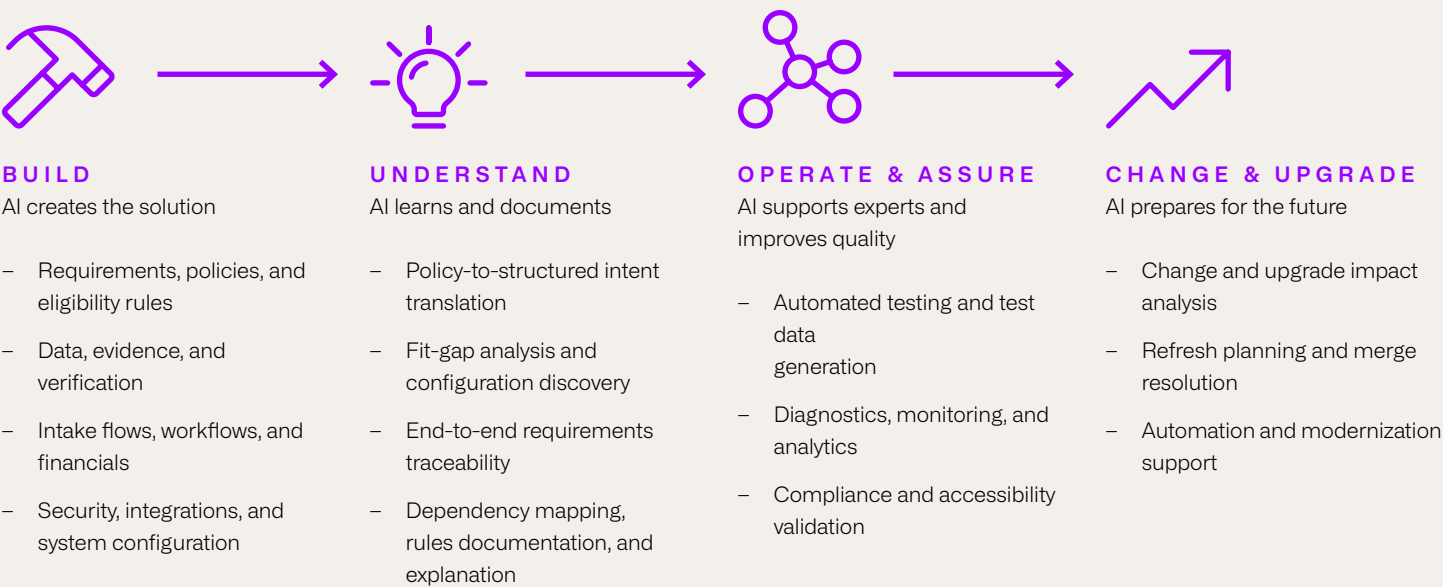

This is not generic AI.

It is AI designed specifically for health and human services. It understands the concepts, artifacts, configurations, and delivery patterns that power social programs. Every output remains explainable, traceable, and subject to expert review and validation. People remain in control of every decision.

Cúram Catalyst is how agencies move from vision to value faster.

AI embedded across the entire social program lifecycle

Cúram Catalyst supports agencies through the continuous lifecycle of building, understanding, assuring, improving, and evolving social programs. Instead of treating modernization as a large periodic project, agencies can continuously improve and adapt their solutions with greater confidence and lower risk.

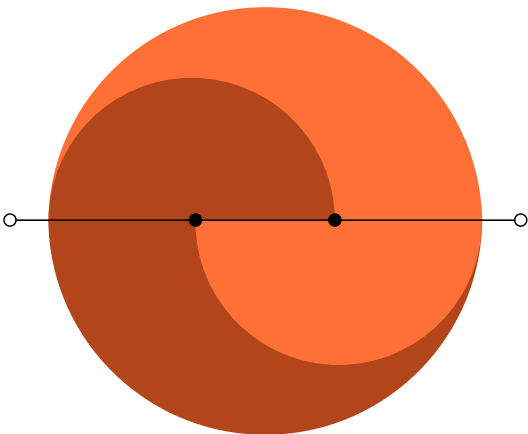

The human services lifecycle is continuous. Modernization isn't a one-time event, it's an ongoing journey that Cúram Catalyst supports at every stage.

Trusted by design: Catalyst generates, humans decide

Cúram Catalyst is designed to help agencies adopt AI with confidence. Built on more than 25 years of Cúram health and human services expertise, Cúram Catalyst combines AI-driven acceleration with the governance, transparency, and control agencies require.

Every output can be reviewed, validated, and refined by experts, helping ensure decisions remain explainable, traceable, and aligned with program objectives. Rather than replacing human judgment, Cúram Catalyst amplifies it, enabling agencies to move faster, improve quality, preserve institutional knowledge, and continuously evolve their solutions while keeping people firmly in control.

Impact where it matters most

For agencies

Agencies can launch and evolve programs faster, without the risk and complexity of traditional implementations. By translating policy and requirements into configurations more quickly, Catalyst reduces manual design effort, lowers reliance on custom code, and improves consistency across implementations.

Agencies move from disruptive, one-time modernization to continuous innovation, adopting new capabilities while preserving existing investments.

For implementation teams

Daily work becomes more efficient and less repetitive. Instead of manually defining data models, writing rules, and documenting every requirement, teams generate, analyze, and validate program assets with AI support.

Every requirement can be traced. Every decision can be explained. Every dependency can be discovered. This reduces effort, shortens delivery timelines, and preserves institutional knowledge long after a project ends.

For the people they serve

When agencies build, understand, and evolve programs faster, people and families receive services sooner and more consistently.

Faster time to delivery, fewer errors, and clearer explanations of decisions translate directly into better experiences and improved outcomes for those relying on critical programs and services.

Continuous modernization starts here

Cúram Catalyst helps agencies continuously build, understand, operate, and evolve their solutions while preserving existing investments, reducing delivery effort, and accelerating outcomes. See Cúram Catalyst in action and discover how trusted Cúram expertise, amplified by AI, can help your agency move from vision to value faster.

[Let's talk](#) about how Cúram Catalyst can support your agency with a trusted foundation for an AI-driven future.

About Cúram

Cúram by Merative has over 25 years of experience helping national, regional, and local governments, and organizations across health and social ecosystems, to transform the delivery of social services, empower caseworkers, and help individuals and families access the programs they need to achieve better outcomes. Cúram solutions and services expertise are trusted in 12 countries and jurisdictions, and support over 970 government programs. Available in 7 languages, the Cúram platform connects benefits administrators, social services agencies, and case managers, to serve and protect 187 million citizens annually.
