

Dyna AI for DynaMedex

Bringing the power of Micromedex to AI-driven clinical decision support for the whole care team

Dyna AI for DynaMedex® elevates clinical decision support by uniting intelligent AI capabilities with trusted content from two award-winning solutions: Micromedex® and DynaMed®. It provides the whole care team with seamless access to drug dosing, contraindications, and safety information alongside disease guidance, to empower confident decisions and efficient care.

What makes Dyna AI different

We know that at the point of care, accuracy and speed are paramount. Dyna AI isn't just another search tool; it is a synthesis of the industry's most trusted drug and disease content, designed to support workflows across the clinical care team without interruption.

Truly integrated insights

Dyna AI Mode synthesizes both drug and disease information to analyze clinical questions holistically. Instead of fragmented data points, clinicians receive a single, concise answer that captures the full clinical context. This approach supports streamlined decision-making from diagnosis to treatment.

Point-of-care dosing guidance

Addressing one of the most frequent and essential clinical questions at the point of care, Dyna AI provides accurate adult and pediatric dosing information from Micromedex directly within the Dyna AI response. This ensures immediate clarity on dosing, administration, adjustments, contraindications, and safety information alongside disease guidance.

Trusted content and proven excellence

Dyna AI leverages the evidence-based, expert-curated content from Micromedex alongside DynaMed to ensure accuracy and reliability.

Micromedex: Ranked Best in KLAS 2026 for clinical decision support: point-of-care drug reference.

DynaMedex: Ranked Best in KLAS 2026 for clinical decision support: point-of-care disease reference.
