Editor_Applications_2.1 is released.

The Editor Applications asset that replaced the Flash-dependent editors for Cúram has been updated in version 8.2.2. This tech note describes the background to the changes, provides a full description of the asset, and outlines how to download and install the asset.

Background

Cúram 8.2.2.0 has been updated with support for a new Dynamic Evidence metadata element. Version 2.1 of the Editor applications has been introduced with updates made to the Dynamic Evidence Editor to support this metadata element.

Installing the asset

Download and install the asset from [Merative Support](#) and follow the instructions in the download or in the installation guide from [Product documentation and PDFs](#).

Editor Applications asset

Use the Editor Applications asset to enable stand-alone versions of the following editors:

- The Cúram Express Rules (CER) editor.
- The Data Mapping editor.
- The Data Store editor.
- The Intelligent Evidence Gathering (IEG) editor.
- The Decision Matrix editor.
- The Dynamic Evidence editor.

For more details, please refer to the “Related checkbox fields in a cluster are not programmatically grouped” section in the 8.2.2.0 release notes.
