

One trusted standard across every source, every team, every decision.

Healthcare organizations have more data than ever. But without shared methodologies, definitions, and benchmarks, more data can still mean different answers.

Truven Meridian is the trusted data foundation behind Truven applications, now available directly in the tools and environments customers already use.

STANDARDIZE

Work from the same definitions.

Apply proven Truven methodologies, groupers, and measures consistently across healthcare data.

ENRICH

Move beyond raw data.

Bring healthcare intelligence, analytic enrichments, and risk models into the data your teams use.

BENCHMARK

Know where you really stand.

Put performance into context with trusted MarketScan benchmarks.

MAINTAIN

Keep intelligence current.

A regularly refreshed standard means teams aren't working from a one-time transformation.

ACCESS

Put trusted intelligence to work in your environment.

Bring curated, analytics-ready healthcare data into the tools and technologies your teams already use.

ALIGN

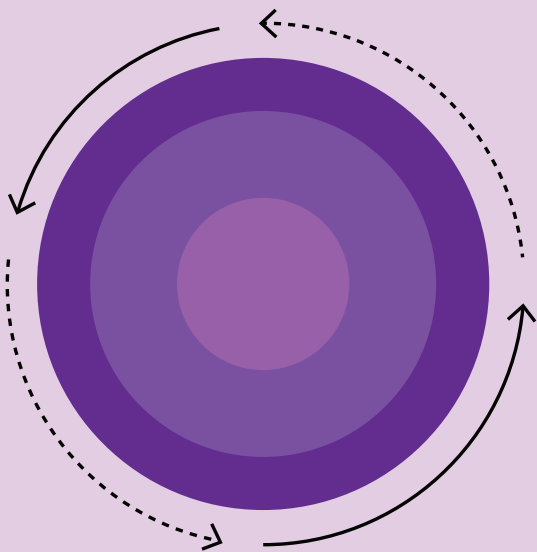

Make decisions from a consistent foundation.

Spend less time rebuilding analytic logic and reconciling conflicting answers.

Meridian doesn't simply move data. It helps organizations put trusted healthcare intelligence to work wherever analysis, workflows, and decisions happen.

Standardized. Enriched. Benchmarked. Maintained.

So teams can spend less time preparing and reconciling healthcare data and more time putting trusted intelligence to work.

Built on Truven’s proven analytics foundation

Documented, auditable methods and provenance

40 yrs

Continuously curated healthcare data

450+

Data suppliers
