

A proven partnership for modern child welfare

Aligning caseworkers, agency leaders, and CIOs around one federally defensible CCWIS platform

When federal oversight, public accountability, and frontline realities intersect, the truth about your CCWIS platform becomes clear—either its gaps are exposed, or it proves its ability to advance your agency’s mission.

Cúram and D2Sol bridge the divide between the promise of CCWIS and the limitations of legacy systems—delivering what compliance and innovation demand.

Why this partnership is different

Cúram and D2Sol bring together product leadership and system integrator execution to deliver federally defensible child welfare systems.

Cúram and D2Sol bring more than 20 years of shared implementation experience

Many members of the Cúram and D2Sol leadership and delivery teams have been implementing Cúram solutions together since the early 2000s. That continuity gives states a single, integrated delivery ecosystem with decades of institutional knowledge across CCWIS, Medicaid, SNAP, TANF, Child Care, and other federal entitlements.

Who Cúram is

Cúram is a purpose-built platform for Health and Human Services

Cúram has been transforming the delivery of social services globally for over 25 years. We have deep experience in working with national, regional, and local governments, as well as organizations within health and social ecosystems. Our mission is to enable governments to transform the delivery of services, empower caseworkers, and help individuals and families access the programs they need to achieve better outcomes.

We specialize in key domains such as integrated eligibility and enrollment, child welfare, and citizen engagement, delivering innovative solutions that streamline processes, enhance citizen experiences, improve operational efficiency, and drive better outcomes for social service delivery.

Who D2Sol is

Cúram’s predominant system integrator for Health and Human Services

D2Sol is a privately held software and professional services firm specializing exclusively in government social services since 2012. Our teams deliver full lifecycle implementation, modernization, and operations for child welfare, Medicaid, SNAP, TANF, and integrated eligibility platforms across the United States and Canada.

D2Sol is a certified woman owned and minority owned business enterprise recognized by multiple states, often referred to as an MWBE. This allows states to meet supplier diversity goals while engaging one of the most experienced Cúram system integrators in the market.

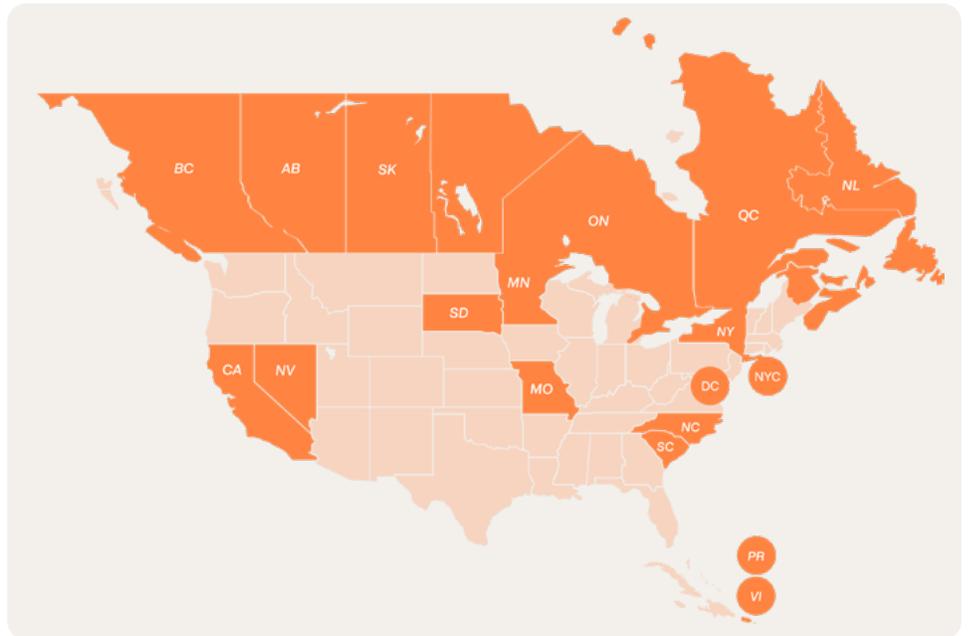

We bring over 200 Cúram Certified Professionals with an average of more than 15 years of platform experience.

Scale and credibility

M&O vendor for Washington DC integrated eligibility system (DCAS)

Awarded contract for Puerto Rico Medicaid M&O contract

For caseworkers

- Improved efficiency and reduced administrative burden
- One and done data entry with guided workflows
- Mobile and offline field work
- Supports federal reporting, federal reviews, data exchanges, and ICWA requirements
- Unified records across child welfare, Medicaid, SNAP, and providers

Outcome: They spend more time with families and less time managing systems.

For supervisors and regional leaders

- Real time operational dashboards
- Alerts for overdue visits, assessments, and approvals
- Human services data model supportive of reporting requirements and system validations to support data quality
- Outcome tracking for safety and permanency
- Audit ready reporting
- Workflows that allow supervisors to approve, edit, or return the work product for additional information or edits
- Assessment tools to support clinical decisions regarding safety and risk Evidence for budgets and performance

Outcome: They will gain workload management and adherence to policy and practice guidelines.

For CIOs and IT leaders

Decades of experience working with ACF, CMS, USDA and federal reviewers to prepare evidence, support CCWIS self assessments, and pass certification and audit reviews.

- CCWIS and IV-E aligned architecture
- Supports AFCARS, NYTD, NCANDS, and ICWA so data is consistent, traceable, and defensible
- Secure, NIST 800 53 compliant cloud
- Interoperability across HHS, courts, providers, and partners
- Data quality and traceability
- Modular, configurable platform that adapts to policy, program, and technology change

Outcome: They gain confidence that the system protects funding, credibility, and public trust

Why this partnership is the safest choice

Long term proven partnership

Deep child welfare expertise

System integrator credibility on Cúram

Federal compliance embedded

Safest and strongest choice for a state
