

Get to know DynaMedex

DynaMedex is the all-in-one resource for evidence-based clinical information, bringing together two award-winning solutions: drug and interaction insights from Micromedex and disease and condition information from DynaMed, supporting the whole care team with medication safety and patient care.

Micromedex

DynaMedex®

Confidence

- A rigorous editorial process accredited by the National Institute of Health and Care Excellence
- Compendium status recognized by the U.S. Centers for Medicare and Medicaid Services (CMS)
- Unbiased clinical content and practice recommendations subject to EBSCO's rigorous Conflict of Interest Policy
- Best in KLAS 2024 for clinical decision support: point-of-care clinical reference

Comprehensive content

- 2,600+ drug reference monographs that offer current, evidence-based information
- Includes off-label indications, comprehensive, trusted adult, pediatric, and neonatal drug information
- Tools to support patient safety, such as IV compatibility, drug interactions, drug identification, drug comparison, and a suite of 650+ clinical calculators
- Fully referenced, evidence-based Drug Consult articles that cover a wide range of topics on drug therapies and treatment guidelines
- Robust coverage of 35+ specialties
- Disease topics include overviews and recommendations, general information, guidelines and quality measures
- Personalized alerts including those that are potentially practice changing
- Integrated Differential Diagnosis tool to help improve diagnosis quality, leading to more cost-effective care
- Decision aids for advanced clinical decision support, patient engagement, and shared decision making
- Multimedia from leading publishers including photos, videos, 3D models and illustrations, and proprietary multimedia and algorithms

Transparency

- Recommendations are distinguished based on evidence, published guidelines, or when necessary, expert opinion, with one-click access to full text resources

Ease of use

- Powerful search technology that speeds time from question to answer
- Single Sign-On (SSO) to save time
- EHR integration for enhanced workflow efficiency
- Mobile options which support offline use
