Truven

Turn healthcare data into actionable insights

Enhance your insights
Our analytics-as-a-service model allows you to expand your existing analytics to align with business priorities including care management, financial analysis, provider performance and account management.

Get precise answers
Leverage interconnected analytics that build upon and enhance each other. Select just the analytics you need or package multiple methods to address specific priorities.

Accelerate time to value
Embed analytic content directly into your enterprise data warehouse to reduce analytic latency and time to value. Run multiple methods at once for better efficiency.

Decrease maintenance
We keep the methods current, so you can spend less time maintaining analytics, and more time on value-add activities.

Be more efficient
Our analytics use standardized formats for all inputs and outputs, simplifying implementation, enabling end-to-end workflow efficiency, and freeing up your IT team.

merative

Enterprise analytics are the bridge that can connect claims, clinical and operational data to the critical insights needed for data-driven decision-making. With Flexible Analytics, we've taken the intelligence within our healthcare analytics platform Health Insights and made it available as a catalog of clinically robust, time-tested, off-the-shelf analytic methods to enrich patient data. License the analytics you need, when you need them, and scale as needs shift without changing your underlying infrastructure.

Make your data work for you

Hosted on Microsoft Azure, our best-in-class, industry standard analytics can be integrated with any data warehouse or business intelligence tool. Developed and maintained by our team of certified coders and data scientists, Flexible Analytics is trusted throughout the healthcare ecosystem by top health plans, providers, employers, and healthcare technology companies.

HEALTH PLAN

Accelerate value-based care through advanced analytics

Blue Cross of Idaho needed to accelerate value-based care by transitioning provider contracts from the fee-for-service model to a cutting-edge value-based system.

They leveraged Truven's robust clinical analytic methodologies and risk adjustment to evaluate episodes of care and report on physician/clinic performance, yielding potential savings of $6.5 million annually.

"Merative is helping us look at data differently than we did before," said Drew Hobby, Chief Revenue Officer, Blue Cross of Idaho. "That software, plus predictive analytic and continuous measurement capabilities, allows us to drive smarter decisions through better outcomes – and save our large and small groups money."
