

NEONATAL AND PEDIATRIC FOCUSED DRUG INFORMATION

NeoFax and Pediatrics: population-specific decision support

Trusted guidance when treating your youngest patients

Clinical decision support tailored to age and indication

Managing drug therapy for a premature two-day-old baby in the neonatal intensive care unit is not the same as treating a six year-old child in the pediatric unit. When it comes to providing safe and effective drug therapy, there are clinically significant differences between neonatal and pediatric populations.

Having access to distinct, population-specific drug information is critical to ensuring the safety of your most vulnerable patients.

Micromedex NeoFax® and Pediatrics solutions highlight variations in dosage, administration, pharmacokinetics, monitoring, and potential side effects, which can be different and clinically important across these populations. It offers a clear reference point for treatment options covering medication management, clinical studies, and guideline summaries.

Highlights

- **Ensure focus and save time** with separate neonatal and pediatric monographs that get you to the relevant population-specific information faster
- **Support patient safety** with population-specific dosing based on indication and patient age
- **Inform off-label treatment decisions** with information that provides context, relevance, and caveats around available supporting evidence
- **Tailor enteral nutrition support** to meet the needs of each patient with easy comparison of multiple products including infant formulas and human milk fortifiers
- **Access information when and where you need it** with full drug monograph and infant formula content online and on your mobile app

Little lives, big responsibility: Peace of mind when it matters most

Building on the history and reputation of NeoFax, Micromedex neonatal and pediatrics content provides trusted, evidence-based drug information for neonatal and pediatric patients. Its comprehensive editorial processes ensure accuracy, guided by published literature, clinical guidelines, and regulatory information.

The NeoFax and Pediatrics solutions are part of the drug information family of content of Micromedex, your trusted partner for clinical decision support:

Trusted for 50 years by government agencies and clinicians alike

Helps care teams across more than 80 countries support the highest levels of patient care

Accredited by the National Institute for Health and Care Excellence (NICE) for the process used to develop Micromedex content

Available online, and on mobile devices

“As far as my go-to source for pediatrics and neonatal, Micromedex is my number one. That’s what I rely on and that is what the neonatologists rely on. When there’s something special that the neonatologists want, compounding for a baby, Micromedex is right on top as far as getting you what to use, how much to use, what solution to use, and what the concentration is going to be. We put it on formulary using the compounding solutions that are recommended by Micromedex.”

Anthony Bono
Pharmacist
Englewood Hospital, New Jersey, United States
