The Software may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the Software at one time. Client must obtain separate, dedicated entitlements for each Authorized User given access to the Software in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. Authorized User entitlements for any Software designated as "Professional" in the Software name authorize a third party person not employed by Client to access the Software solely to view data or provide input and data to Client in support of delivering the service delivery program.

Software Use Not Used for Establishing Required Entitlements

Client's use of all Legacy Software is subject to the license type specified in the agreement pursuant to which Client originally acquired the rights to use the Legacy Software ("Legacy Agreement").
