

WHAT'S NEW?

You are now upgrading to Truven Health Insights 6.0!

With the enhanced [Truven Health Insights](#), everyone across the organization – especially business users – can surface actionable insights with even more confidence and speed. We doubled down on the qualities that have made Health Insights a leader: best-in-class data quality, innovative advanced analytics, and proven expertise.

On top of that, we've made it even easier to find real-time trends, drivers, and insights, regardless of analytics skills, including:

New self-service tools to explore data in a variety of ways

- Our new Visualization Studio makes it easy to personalize the experience with data visualizations and metrics that reflect unique business needs – no middleman needed.
- All our dashboards are now available as a “jump start” helping clients quickly build new personalized views to make insights even more relevant.
- Clients can also collaborate on dashboards and reports created by their community of users with the new Content Catalog.

Integrated reporting for easy collaboration

- Health Insights offers a simplified and seamless workflow for business users and power users to collaborate and report on detailed analyses, such as program comparisons that can uncover potential savings.
- Users can easily move from dashboards to the Ad Hoc Report Writer, a no-code reporting tool that's tailor-made for power users who want to dig deeper into the data and report out to stakeholders.

Cloud architecture for enhanced performance

- Our cloud-based platform provides a secure foundation and functionality for healthcare data analysis, including unified security management and best-in-class security scanning, code, and application security.
- We built Health Insights on Microsoft Azure to support scalability, reliability, performance, and important security and compliance frameworks such as HIPAA.

Modernized data pipeline for faster time to insights

- We've made several improvements under the hood to dramatically reduce the time it takes to glean value from data, enabling faster and more frequent system data updates.
- It's all backed by more than 400 automated data quality checks at each phase in our processing pipeline to ensure trust and confidence in the insights.

As always, Truven is your co-pilot to success. You can always reach out to your Truven account team for questions around your specific upgrade schedule.

About Truven

Truven by Merative is a portfolio of healthcare data and analytics solutions, backed by 40 years of deep healthcare expertise. We provide trusted insights and proven expertise to help employers, health plans, life sciences organizations, and government agencies drive better health and financial outcomes. With market-leading solutions like Health Insights and MarketScan, Truven serves 7 of the top U.S. health plans, over 40% of the Fortune 500, and the top 20 global pharmaceutical companies.
