MarketScan: Mortality Database

Do more with the data you've trusted for decades.
The MarketScan Mortality Database is a pioneering addition to MarketScan. This new offering integrates vital mortality data, including the year and month of death, with the detailed enrollment and claims data found in the MarketScan Commercial and Medicare Databases. Researchers and healthcare professionals can now evaluate mortality as a potential outcome in various studies, enhancing the depth and breadth of their research.

Key Features:

– **Mortality Data Integration:** Includes year and month of death data, sourced from the Social Security Administration's Death Master File and Health Insights Discharge status.

– **Robust Data Set:** Integrates death information with comprehensive enrollment and claims data, covering a vast patient population.

– **Diverse Research Applications:** Enables studies on safety and effectiveness, healthcare delivery systems, end-of-life care economics, and population health trends.

Benefits:

– **Enhanced Research Accuracy:** Provides a more complete picture of patient outcomes, supporting age- and risk-adjusted mortality studies.

– **Speed to Insight:** Quickly access a rich and comprehensive dataset for faster, more informed decisions.

– **Broad Use Applications:** Ideal for regulatory processes, epidemiological research, and HEOR, supporting a wide range of healthcare and research organizations.
