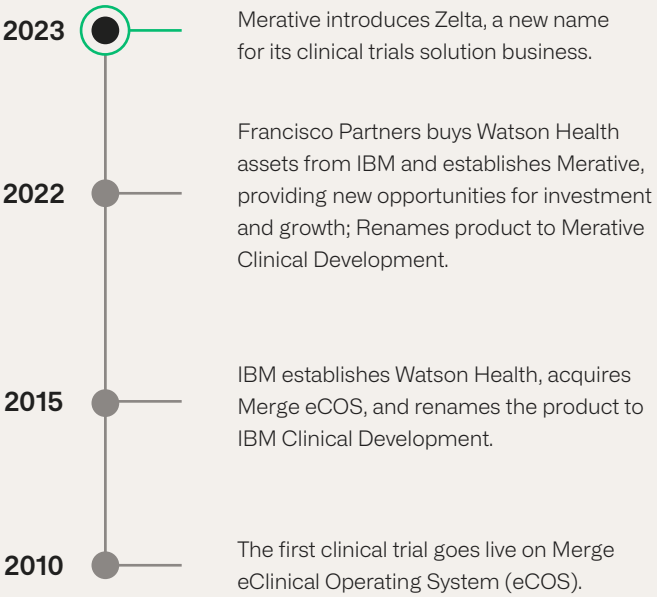
Zelta

Accelerate your clinical trials with control and confidence

Zelta™ is Merative's clinical trials solutions business that includes both a clinical data management and acquisition cloud-based platform, and consulting, enablement and extension services.

EXPERIENCE AND VISION

Our name is new but the platform is not. It still encompasses the vision and innovation that created a single user experience to help accelerate clinical trials more than a decade ago.



GLOBAL

Study sites and participants in 109 countries, supporting 75+ languages and dialects, are engaged in research using Zelta in more than **4,500** studies from startup to submission, across all phases, including adaptive design protocols, and in over **500** phase III trials, as well as in 23 therapeutic areas.

CONTROL

Build upon the core EDC functionality by choosing from our **10+ fully integrated** modules that help accelerate outcomes for each study. Control down to the study level to optimize outcomes across your research portfolio and operational models (conventional, decentralized and hybrid).

CONFIDENCE

Trusted by more than **200** contract research organizations, medical device and biopharma companies, and academic research organizations to deliver trials across all phases and levels of complexity.

USER FRIENDLY

Use single sign-on from anywhere in the world to access the unified solution built on one code base. Benefit from best-in-class, **24/7/365** support from certified, trained designers and employees as well as consulting, enablement, and extension services to ensure your success.

Learn how you can control every stage of your clinical trial with confidence.
